[Get Xubuntu](#) [About](#) [Help & Support](#)[The Community](#)[Development](#)[The Blog](#)

Xubuntu is a community developed operating system that combines elegance and ease of use.

Xubuntu is an elegant and easy to use operating system. Xubuntu comes with Xfce, which is a stable, light and configurable desktop environment.

Xubuntu is perfect for those who want the most out of their desktops, laptops and netbooks with a modern look and enough features for efficient, daily usage. It works well on older hardware too.

The image shows the LibreOffice Writer application window titled "Sin título 1 - LibreOffice Writer". The interface includes a toolbar at the top with various icons for file operations, search, and text styling. Below the toolbar is a menu bar with "Estilo predeterminar" and "Liberation Serif" selected. A font size dropdown set to "12" and a ruler showing text alignment are also present. The main workspace is a blank white area with two small blue handles for dragging. On the right, there's a vertical sidebar with icons for text, tables, images, and other document elements. The bottom of the window displays status information like page count, word count, and language settings (Español (Chile)).

[Home/News](#) | [Download](#) | [Pics/Flicks](#) | [Docs](#) | [Wiki](#) | [Forum](#) | [IRC](#) | [Discord](#) | [Community](#) | [The Team](#) | [Search](#)

What is AssaultCube?

AssaultCube is a **FREE**, multiplayer, first-person shooter game, based on the [CUBE engine](#).

Taking place in [realistic environments](#), with fast, arcade gameplay, it's addictive and fun!

With efficient bandwidth usage, it's low-latency and can even run over a 56 Kbps connection. It's tiny too, weighing in at a lightweight about 50 MB package available for Windows, Mac and Linux.

On the correct settings, it can even run on old hardware (Pentium III and above).

Features in a nutshell:

- It's **FREE**.

Download it here:

Microsoft Windows

Apple Mac OS X

Linux

Size: 47 - 54MB

Version: 1.2.0.2

Released: 10 Nov 2013

Help! How do I?

If you need some help with anything at all, please first search through the [official documentation](#).

If you still can't find the answer you need, [search the wiki](#), and the [forums](#), and if you still can't find the answer, post a thread on the forum explaining your
